Clarke's Pansy Seed

GROWERS PRICE LIST

DECEMBER, 1943

The mild climate and fertile soil of the Willamette Valley in Oregon distinguish it as the only location in the entire United States which has growing conditions comparable with those of England and of the seed producing portions of Continental Europe. The seed here offered is grown in this valley, near Portland, and is based on the finest foreign and domestic strains. The planting is carefully and thoroughly "rogued" and the crop is given personal attention throughout the season. The result is vigorous seed which produces early blooms, having a wide color range, excellent texture, and largest size.
